

VERSABUILT ROBOTICS

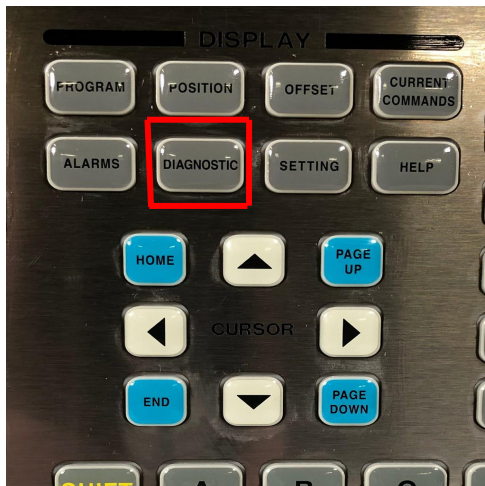

How to Determine if your
Haas Control is NGC or CHC

Haas Control Type

How to determine if your Haas Control is NGC or CHC:

- Look at the 'Display' section of the Haas control on the machine in question
 - There are two rows of 4 buttons under the 'Display' section
 - On the bottom row, the second button from the left will be called either 'Diagnostic' or 'Param/Dgnos'
- If the control has a 'Param/Dgnos' button then the control is CHC or Legacy
- If the control has a 'Diagnostic' button then the control is NGC

NGC Control

CHC or Legacy Control
